ConQuest Case® SINGLE LID CASE FEATURES

High Strength Aluminum Case Shell

ConQuest single lid case shells are manufactured from 5052-H32 aluminum, one of the strongest formable aluminum alloys. ConQuest single lid cases are available in three performance grades:

- Standard Duty: 0.063 in. (1.60 mm) aluminum shell
- Medium Duty: 0.090 in. (2.29 mm) aluminum shell
- Super Duty: 0.125 in. (3.18 mm) aluminum shell

Case Shell Finish

ConQuest single lid cases are supplied in the machine sanded finish as standard. Powder coat finishes are optional (please see case options section).

Riveted Construction

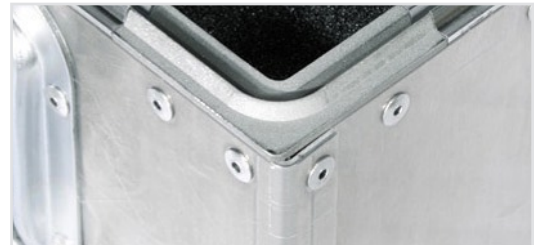

ConQuest cases are fabricated aluminum cases using a proprietary formed panel joint system and riveted construction. Key benefits of this construction are:

- No edge extrusion to be torn off – the Achilles' heel of laminated plywood road cases
- Edges won't crack or split upon direct impact

High Strength Valance System (Patents Pending)

Impact's proprietary high strength square tubular valance and corner lug system (patents pending) ensures that ConQuest cases remains square with reinforced valance corners which will won't split or separate over time.

High Strength Case Hardware

ConQuest cases are supplied with premium grade high strength, zinc plated case hardware.
